### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Surinder Sachar on January 16, 2007.

The application has been amended as follows:

#### IN THE CLAIMS:

##### Claim 1:

- Line 11, before "two lens surfaces" added --at least--.

##### Claim 15:

- Line 17, before "two lens surfaces" added --at least--.

##### Claim 16:

- Line 20, before "two lens surfaces" added --at least--.

##### Claim 19:

- Line 20, before "two lens surfaces" added --at least--.

##### Claim 20:

- Line 23, before "two lens surfaces" added --at least--.

2. The following is an examiner's statement of reasons for allowance: Claims 1-9 and 11-22 are allowed at least for the reason that the prior art of record does not teach or reasonably suggest the scanning optical system comprising two lenses wherein the lens on the side of the optical deflector has a negative refracting power in sub-scanning direction, the lens on the side of the surface to be scanned has a positive refracting power in the sub-scanning direction, at least one lens surface of the lens surfaces of said two lenses is such that a shape in the sub-scanning section direction is a non-arc shape, and said at least one lens surface has a non-coaxial surface, wherein at least two lens surfaces such that a curvature in a sub-scanning section varies in the main scanning direction are formed in different lenses, at least one surface of said at least two lens surfaces is such that change in the main scanning direction of a curvature in a sub-scanning section is asymmetrical, and wherein said optical system is such that a lateral magnification  $\beta_2$  in the sub-scanning direction at a central height and a lateral magnification  $\beta_h$  in the sub-scanning direction at any image height satisfy the condition  $0.93 < |\beta_h / \beta_2| < 1.07$  as set forth in the claimed combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
